

# **SUSTAINABILITY REPORT HIKE&BIKE AGENCY 2022**

## **HIKE&BIKE VISION**

We want to become a leading travel agency in the Julian Alps that offers clients unique experiences of cycling and hiking in the mountains.

## **WHAT HAVE WE ACHIEVED IN 2022?**

- We maintained Travelife partner status.
- We tried our best to be responsible and sustainable in our waste management. We tried to minimize our waste and we recycled the waste that we produced.
- We encouraged people who spent their summer vacation in Bohinj valley and day guests to rent bikes and explore the area by bike.
- Our printing was minimized as much as possible. We only printed the documents that were absolutely necessary.
- We are sending all our documents electronically to our account manager.
- Our suppliers are sending us invoices electronically.
- We commute to our office by bike whenever possible.
- We have included in our tours visits of the local farmers market and visits of the local producers where the guests had the chance to buy local products and souvenirs on site.
- One of our products (Forest melody) has attained "Slovenia unique experience" certificate issued by the Slovenian tourism organization. The product has a very strong environmental component where we put a lot of emphasis on the important role of the forest in the ecosystem, maintaining the forest and sustainable use of forests.
